

PEAK

TRITON

CARTRIDGE NEEDLES

Tattoo with unparalleled control using Peak Triton cartridge needles. Featuring US-patented stabilizing technology, Triton cartridges give you expert-level precision for true, steady needles even when working with large magnums.

All Triton cartridge needles are razor-sharp and slightly textured, allowing you to pull crisp lines and pack in color with ease. These needles are also designed to easily penetrate the skin, causing less trauma than traditional cartridge needles.

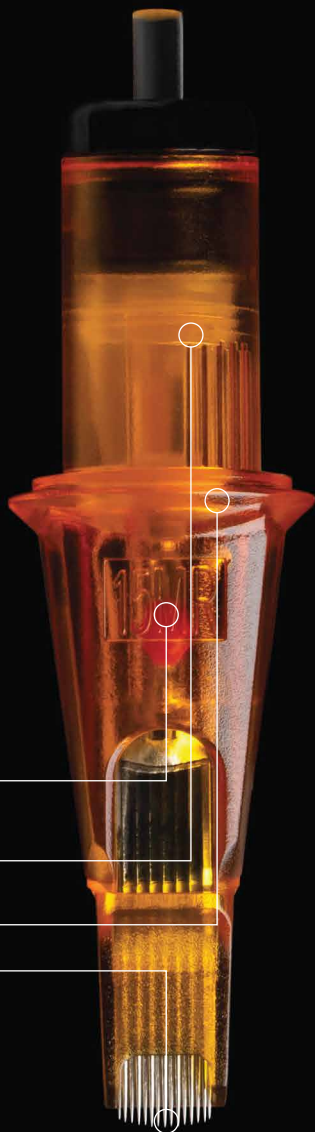

Get the highest performance thanks to Triton's:

US-patented linear technology with stabilizing plunger ball

Full safety membrane to prevent ink back flow

Medical-grade plastic housing

316L Surgical Steel
